Subject: RE: Non-commercial data request for planning objection
Date: 8 December 2025 at 16:28:18 GMT

Hello Michael,

My colleague has passed this query onto me. Apologies for the delay in getting back to you on this, I was on annual leave for latter half of last week.

I'm afraid I'm not qualified to offer any official advice on sourcing and using data for an objection to a planning application. But I can help you with sourcing data which might be helpful to you from the NBN Atlas.

I have completed a search using the coordinates you have searched and used a 2km search radius. As the site covers a smaller area it's probably more useful to use a smaller search radius. However, some species may be deemed sensitive, so by using a 2km search radius, this should pick up any generalised records of sensitive species on the site. I have then filtered this search for species which are listed on [The Conservation of Habitats and Species Regulations 2010 - Schedule 2, Schedule 4 and Schedule 5](#) (European protected species) and [Scottish Biodiversity list](#) (should encompass all species of importance in Scotland) species lists.

Please see the search [here](#), where you can explore and download the records.

If you have not already, I would advise you contact the relevant Local Environmental Record Centre, which will [be The Wildlife Information Centre for south-east and central Scotland \(TWIC\)](#). They should be able to provide advise of which species records you should use and be able to supply these records. They will likely hold data on veteran trees too. We may hold records for veteran trees on the NBN Atlas, but these may not be easy to identify in a search.

I hope this information is useful to you. Please let me know if you have any questions.

Kind regards,
Rhiann

Rhiannydd Stock (she/her)

Subject: Non-commercial data request for planning objection

Dear NBN/Andy,

Thanks for speaking to me just now.

I would like to make a non-commercial data request that I can use to submit as evidence as part of an objection in a planning appeal run by the DPEA. I have an absolute deadline to submit an objection of 22 Dec, but I am hoping that you will be able to provide data before 15 Dec at the latest. Hopefully much earlier?

I am looking for European Protected Species (eg bats and otter), Nationally protected species (badger, red squirrel) and (if you have them) tree / woodland records. Do you hold any other data that might be relevant to a planning objection for riparian woodland on the Tweed SAC?

The development site is the red bounded area on the attached location plan map, immediately adjacent to Kingsmeadows House, Peebles, EH45 9HR. The approximate location is 55.64710° N, 3.17726° W, and the north-south (river to road) extent of the site is say 140m.

I am not sure what the appropriate search radii should be for each of the protected species and I'm hoping you can advise?

I know that you should have quite a few verified records including bats and otter. For example my wife submitted some of those records via iRecord, which have been verified.

I'm not sure whether you have tree data from the Ancient Tree Inventory, or what the appropriate search radius would be for woodland, but the woodland as a whole contains 91 trees on the ATI, of which 10 are veterans (if memory serves). This link should show relevant trees from the ATI

<https://ati.woodlandtrust.org.uk/tree-search/?v=2332259&ml=map&z=17&nwLat=55.64939688030492&nwLng=-3.1901563757354956&seLat=55.644886536579875&seLng=-3.1695570105011206>

Kind regards,

Michael
